ECOGAS

MICROBOX

High level Description

Made of reinforced concrete, it can be designed according to Customer's needs, with the compressor room, the electrical panel room and/or the PRS, and the space for cylinder pack installation in the compressor room or in a dedicated room.

Made of steel, customizable according to Client's technical requirements, it is generally equipped with an access door, roof suitable for outdoor installation and anchor points for lifting and handling operations. Access can be locked since it is equipped with a key lock. To allow a quick and safe exit, the internal doors are fitted with panic bars.

Steel-made microbox datasheet

NOISE LEVEL
75 dB(A) @ 3 meters. On request we can offer higher levels of soundproofing.

MAIN COMPONENTS INSTALLED INSIDE
Compressor, electrical panel, storage and damping (blow-down) cylinder packs, priority panel and/or PRS. The Control Panel is installed in a separate room.

MODELS
M4, M6, M8, M10, M12

AUXILIARY SYSTEMS INSTALLED INSIDE
Compressor room lighting, gas sensor, acoustic and visual alarm system, air extractor, air compressor, emergency button, electrical and earthing connections.

Dimensions

Meters (feet) - LxWxH
Standard dimensions. Customization available upon Customer request

M4	M6	M8	M10	M12
4.4x2.3x2.4 (14.5X7.6X7.9)	6.2x2.3x2.4 (20.5X7.6X7.9)	7.6x2.3x2.4 (25X7.6X7.9)	9.7x2.3x2.4 (32X7.6X7.9)	12.2x2.4x2.9 (40.3X7.9X9.6)

Benefits

HIGH FLEXIBILITY
They can be fully customized upon Client's technical requirement.

FAST INSTALLATION AND COMMISSIONING
The anchor points installed on container foundations reduce lifting, handling and installation time.

HIGH SAFETY STANDARDS
Sound and weather-proof, they are equipped with locked doors to grant access to authorized personnel only. To allow a quick and safe exit, the internal doors are fitted with panic bars.
